UNSTRUNG

As a young jazz guitar virtuoso, Pat Martino achieved near legendary status during the 60s and 70s before being diagnosed with a life-threatening brain condition. Surgery saved his life but wiped his memory.

“Unstrung” explores the nature of memory, self, creativity and the mysterious brain mechanisms underlying the construction of personal identity. Pat Martino is an unlikely American hero whose moving story holds meaning for us all.

Join us for a reception and Q&A with the legendary Jazz Guitarist, Pat Martino, and filmmaker Ian Knox with other special guests.
