Sir Arthur C. Clarke  
Physicist, Author, Futurist

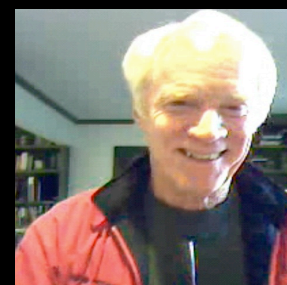

**Sir Arthur C. Clarke,**  
Author "2001: A Space  
Odyssey"  
"Without exaggeration, I  
can say this is one of the  
most important documen-  
taries made. You may  
quote me on this."

## Planetary Defense

[www.SpaceViz.com](http://www.SpaceViz.com)

**"It's not If (an impact  
will happen with the  
Earth), it's When!"**

Premise  
"Planetary Defense" meets  
with both the scientific and  
military communities to  
study our options to miti-  
gate an impact from NEOs  
(Near Earth Objects).

**Rusty Schweickart,**  
Apollo 9 astronaut  
"Your production is the  
best there is regarding  
NEOs, the threat of impact  
and what might be done  
about it."

# Space Viz Productions presents Planetary Defense

**Dr. Steven Ostro,**  
Jet Propulsion Laboratory  
"It's wonderful! It's very  
powerful and very profes-  
sionally done. A real at-  
tention grabber and  
holder. I hope it is widely  
disseminated, and soon.  
Nice work!"

**Dr. Dan Scheeres,**  
University of Michigan  
"I think the movie looks  
great and makes its point  
very effectively. Your pres-  
entation is very well bal-  
anced and gets the phys-  
ics and engineering right."

**Dr. Duncan Steel,**  
Author and Space Scien-  
tist  
"Great stuff. This is a bril-  
liant documentary: con-  
cise, precise, and authori-  
tative."

**David H. Levy,**  
Comet Hunter, Jarnac  
Observatory, AZ  
"A brilliant, original and  
creative look at the danger  
Earth faces from space!"

**Dr. Clark Chapman,**  
Southwest Reserch Insti-  
tute, Boulder, CO  
"There have been many  
documentaries on this  
topic over the years, but  
none have been so error-  
free as yours."

**Jay Tate,**  
Director of the  
Spaceguard Centre, UK  
"I have been involved with  
a number of documenta-  
ries, ranging from the BBC  
to Indian and Estonian TV,  
your production wins  
hands-down!"

**"The current worldwide scare about climate change is certainly a valid concern. But we must not allow these terres-  
trial concerns to distract political attention -- or resources -- from preparing for very real dangers we face from  
outer space. How ironic it would be to mobilise billions of dollars to contain global warming, if our planet is then  
battered by what I once called 'The Hammer of God'!"**

**Sir Arthur C. Clarke, Author, "2001: A Space Odyssey"**

"Planetary Defense" had it's World Premiere  
on [United Nations TV](http://UnitedNations.TV) in New York City and  
via the United Nations web cast to the rest of  
the world.

[Planetary Defense](#) will have it's Canadian  
Television premiere on the CTV Network.

**"Planetary Defense, the film, is a documentary that explores how ill-prepared we are to prevent our own extinction from as-  
teroid and comet impacts. Filmmaker Mark Moidel interviewed all the right people, asked them all the right questions, and  
leaves the viewer scared for our future, but empowered to do something about it."**

**Neil deGrasse Tyson, Astrophysicist and Frederick P. Rose Director, American Museum of Natural History, NYC**
